Sourabh Bundele

Algorithm Developer Intern

Professional Summary

Results-driven DSA Intern with a demonstrated proficiency in Python programming, adept at solving complex problems through strategic application of data structures and sorting algorithms. Possessing strong analytical and communication skills, I bring a dedicated and efficient approach to coding challenges, honed during a one-month internship at Codsoft.

Projects

City Temperature   Github Repo Link

Python

- Created a user-friendly Python application that fetches real-time temperature data for a specified city using an API call
- Implemented city selection feature to allow users to input the name of the city
- Integrated a reliable weather API (OpenWeatherMap) to fetch the latest temperature data
- Displayed temperature in Celsius
- Took responsibility for API registration, Python scripting, and error handling

Multi-Media Downloader with Python   Github Repo Link

Python and Py-tube library

- Developed a versatile Python application using the Py-tube and Instaloader library
- Implemented YouTube video and audio downloader functionality
- Designed and developed functionality for downloading Instagram posts and profile pictures

Experience

CodSoft │ Python Programming(Intern)
Oct 2023 - Nov 2023

- As a Python Programming Intern, I actively contributed to diverse projects, showcasing my proficiency in Python development. Key projects included the creation of a ToDoList, Calculator, and Password Generator, where I applied coding principles to deliver efficient, functional, and well-documented solutions.

Integrano Technologies │ UI Designer
Jan 2022 - April 2022

- As a UI Designer, proficient in transforming Figma designs into responsive web pages and converting WordPress sites into HTML pages, my role encompasses translating visual concepts into functional, user-friendly interfaces. I bring a keen eye for design and a strong technical skill set to deliver seamless digital experiences.
